

yabplot: yet another brain plot

unified 3D neuroimaging visualization in python

workflow components

data fetcher

access external resources

atlas builder

create custom brain atlases

volume projection

project images to surfaces

mesh utilities

create and load meshes

plotting interface

render data as 3D figures

inputs

*images, surfaces, tractograms,
arrays, dictionaries, dataframes*

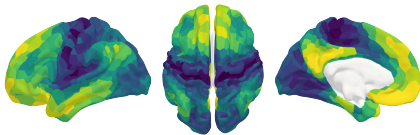

outputs

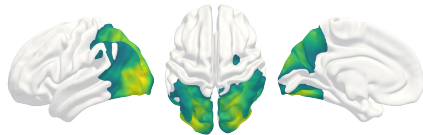

static and interactive figures

plotting capabilities

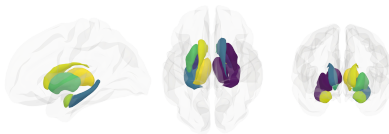

cortical parcellations

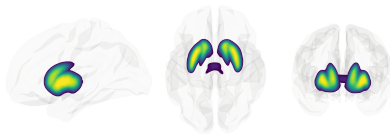

vertex-wise surface maps

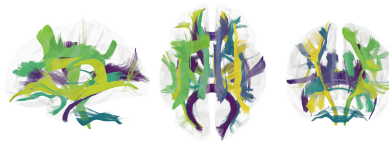

subcortical structures

voxel-wise volumetric maps

white matter tracts

connectome graphs
